Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is response to Applicants' communications filed on 08/30/01.
2. Claims 1-8 are pending in this application.

Drawings

3. The informal drawings are not of sufficient quality to permit examination. Accordingly, new drawings are required in reply to this Office action.

Applicant is given a TWO MONTH time period to submit new drawings in compliance with 37 CFR 1.81. Extensions of time may be obtained under the provisions of 37 CFR 1.136(a). Failure to timely submit new drawings will result in **ABANDONMENT** of the application.

Submitted drawings (dated 09/20/2002 & 10/11/2002) are not with the brief description of the drawings of the specification (see page 5 of spec.). The drawings have more than one figure(s) with labeled fig. 1.

Claim Objections

4. Claim 7 is objected to because of the following informalities: The second line of claim 7, "the content mmay" should be replaced with "the content may". Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Pub. No.: US 2001/0042043 of SHEAR et al. (hereinafter Shear).

With respect to claim 1, Shear teaches a secure electronic media container for storing, transporting (a secure software container can be used to protectively encapsulate various digital property content and control object information: see abstract, lines 17-21) and/or providing a rights management interface to electronic media content, said container having said electronic media content stored therein and data (providing rights management and protection techniques that satisfying the limited copy protection such as for DVD media: Page 3, left column, 0031 and Page 4, left column, 0047), external of but attached to or otherwise associated with said container, representative of the media handler and/or a rights management mechanism required to open and play said content (copy protection and rights management are applied in DVD media such as accessing on or read or write on the DVD media: Page 4, left column, 0047-0049 and

right column, 0054 and play the music or movie being recorded on the DVD media:
Page 5, right column, 0062-0067).

With respect to claim 2, Shear teaches means for determining from said external data what, if any, digital rights management mechanism was used to package said content and for retrieving or otherwise accessing an appropriate digital rights management handler accordingly (rights transfer and other rights management on DVDs' media: Page 7, right column, 0077-0078);

means for passing said content through said digital rights management handler (delivering the content via the copy protection and rights management: Page 4, left column, 0047 and 0051);

means for determining from said external data the media handler required to access and handle the content and for retrieving or otherwise accessing an appropriate media handler (depending on the platform, there are different key management and access techniques to the DVD media: Page 7, right column, 0078);

means for passing said content through said media handler (delivering the content via the copy protection and rights management: Page 4, left column, 0047 and 0051).

With respect to claim 3, Shear teaches a secure container containing media content having attached or otherwise bound thereto metadata which is universally readable and/or decipherable and describes the underlying media format and digital rights management mechanism(s) employed to package the content (see abstract, Page 4, section 0051-54).

With respect to claim 4, Shear teaches wherein the metadata describing the underlying media format encapsulates the content itself (encapsulating such as encrypting or cryptographic techniques: Page 4, section 0051-0054).

With respect to claim 5, Shear teaches wherein the metadata describing the underlying media format includes a remote network resource address at which the content itself is stored (metadata storing in the storage media including information about the storage: Page 15, left column sections 0213-0215; also see Page 4, left column 0051; also see figs. 7, 9 and 12 and Page 7, left column, 0072).

With respect to claim 6, Shear teaches wherein said metadata includes descriptive metadata relevant to said content and/or a reference to a resource location of a format specification and/or a reference to the location of a "rendering" code registry (Page 16, left column sections 0220-0221).

With respect to claim 7, Shear teaches wherein said metadata describing the digital rights management mechanism(s) employed to package the content may refer to an installed component on a local system or a remote component or network service (Page 24, left column, sections 0343-0347 and right column, sections 00351-0354;).

Claim 8 is essentially the same as claim 2 except that it is directed to a method rather than an apparatus, and is rejected for the same reason as applied to the claim 2 hereinabove.
